

# CLARK: Intelligent AI for Internal, Third-Party, and Regulatory Risk Visibility, Reporting, and Management.

## CLARK INSTANTLY DELIVERS ACTIONABLE INSIGHT INTO YOUR COMPLIANCE GAPS, THIRD-PARTY RISK, AND SECURITY POSTURE.

TruOps, our integrated governance, risk, and compliance (GRC) platform and leading multi-tenant solution, is now available with Clark. This cutting-edge, artificial intelligence-based module utilizes your organization's integrated security, risk, and compliance control data to deliver unified visibility, reporting, and recommendations on your security, risk, and compliance posture.

Clark is an intelligent, conversational assistant that extends far beyond traditional chatbots or compliance operations to deliver real-time, meaningful insight to data analytic questions posed in plain, natural language. Clark spans across your entire integrated technology stack to extract, interpret, and provide you with clear answers to your most pressing security, risk, and compliance questions.

## CLARK FLAWLESSLY DELIVERS:

-  A unified view, understanding, and approach to internal, third party, and regulatory risks
-  Data-driven, risk-based dashboards and analysis to support accurate decision-making.
-  Quick, precise, and verified answers and insights for assessments by simply uploading a file.
-  A faster way to view, report, predict, and ultimately respond to risk.

## THE BENEFITS OF CLARK:

Below are just a few samples of how Clark can revolutionize your GRC processes and strategy:

### A UNIFIED VIEW, UNDERSTANDING, AND APPROACH TO ENTERPRISE-WIDE RISK

One of the most immediate benefits Clark provides is **clear visibility into your organization's internal, third party, and regulatory risks**. Ideally suited for any multi-tenant environment, including MSPs or organizations with large portfolio companies, Clark makes requesting, interpreting, reporting, and viewing compliance gaps, third-party vendor risk, and security posture effortless.

### AUTOMATION OF ROUTINE, REPETITIVE TASKS REDUCES WORKLOAD

Clark delivers automation of routine and repetitive tasks such as responding to assessments. You upload an assessment and Clark sets out to scan vast volumes of data from your entire security stack, interprets the data, and then generates a response with a speed and accuracy that significantly reduces staff workload and is sure to boost your organization's ROI.

### **PREDICTIVE ANALYTICS FOR RISK MANAGEMENT**

The security and risk answers Clark provides present your organization with the opportunity to view rolled up data from across your risk siloes from a single pane of glass. This enables visualization and detection of potential risks and vulnerabilities, thereby reducing the time needed to implement proactive measures to mitigate the risks.

### **REGULATORY COMPLIANCE MADE EASIER**

The regulatory landscape constantly evolves, and compliance requirements can be complex and burdensome. Clark can keep you up to date with regulatory changes by analyzing your organization's current compliance posture so you can proactively adjust policies, procedures, and controls necessary to remain compliant and avoid costly penalties.

### **PROACTIVE THIRD-PARTY RISK MANAGEMENT**

Automate and streamline insight into your third-party relationships, perform due diligence, and consistently monitor your vendors, contractors, suppliers, and other third parties' potential risk to your organization.

### **IMPROVED DECISION-MAKING**

The speed at which Clark can provide accurate and insightful responses across your risk siloes can help you make quicker, data-driven, risk-based informed decisions that align with your organization's unique, strategic security goals.

## **CONCLUSION**

As artificial intelligence heralds a transformative era for governance, risk, and compliance processes, TruOps's groundbreaking AI module, Clark, stands poised to revolutionize your organization's GRC landscape by redefining how risk is managed across your enterprise.

Clark is more than just an AI tool; it's a complete solution for managing cyber risks. It tackles the visibility challenges all organizations encounter by automating and simplifying complicated manual data analysis. With Clark, organizations can achieve a substantial return on investment by efficiently capturing, analyzing, and gaining visibility into complex data, allowing them to refocus on strategic tasks.

## **ABOUT TRUOPS**

TruOps is a powerful GRC solution that transforms traditionally siloed modules into a comprehensive risk management solution. Designed to integrate and automate critical GRC functions, TruOps simplifies the security, risk, and compliance processes organizations need to manage and control risk effectively. TruOps meets your organization where it is today and scales to meet evolving cyber risks, whether regulatory, internal, or third party.
